Resilient Navigation & Timing Foundation

Annual Meeting Minutes
December 10, 2021

I. Convening

The annual meeting convened at 12:15 at the Sheraton Pentagon City Hotel, Arlington, VA.

Mr. Dana A. Goward, RNTF President, presided and board members The Hon. Gregory Winfree, and RADM (ret) Jeffery Hathaway attended. Board Chair, The Hon. Martin Faga, and board member CAPT (ret) Pauline Cook sent their regrets.

II. President’s Report

Mr. Goward presented information on the Foundation’s activities since the last meeting. A summary of that report is attached hereto.

III. Discussion

At the conclusion of the President’s report, the board solicited questions and suggestions from members in attendance. Of specific interest were new initiatives the Foundation might undertake to further its mission.

The recent Russian anti-satellite test and subsequent threat to shoot down all GPS satellites was cited as being one of the most effective advocacy efforts furthering the RNTF’s mission since the organization was founded. Mr. Goward stated that the Foundation was using these as “a hook” to connect with members of Congress not previously contacted.

A suggestion was made for a white paper to dispel misinformation heard at SAE about eLoran technology. Mr. Goward said he would seek a small group to act as a writing team.

IV. The meeting adjourned at 12:50

Dana A. Goward
President
